Projects

ExamPortal | *HTML, CSS, JavaScript*

- Built a fully functional **online exam portal** with timed multi-question quizzes and real-time score calculation.
- Implemented **client-side form validation**, session handling, and a results summary page using vanilla JavaScript.
- Designed a clean, responsive UI with CSS Flexbox suitable for classroom and competitive exam scenarios.

TypingTest | *Go (CLI)*

- Developed a **command-line typing speed and accuracy tester** in Go.
- Tracked real-time WPM (words per minute) and error rate with terminal-based live feedback using Go's `time` and `bufio` packages.

Tasker | *Go (TUI)*

- Created a **CLI task manager and to-do list** in Go with persistent JSON-based storage for tasks across sessions.
- Supported full operations: add, list, complete, delete tasks — with priority flags and deadline tracking.

Image Viewer | *C, SDL / SDL2*

- Built a **lightweight desktop image viewer** in C using the SDL2 graphics library for cross-platform rendering.
- Supported PNG, JPG and PPM formats with keyboard-based navigation (next/previous image) and window resizing.

Portfolio Website | *HTML, CSS, JavaScript*

- Designed and deployed a **personal portfolio** showcasing projects, skills, and contact information.
- Built with semantic HTML, responsive CSS, and smooth scroll animations.
